

Original Articles

- 3 **Associations between body dysmorphic disorder (BDD) with the dental health component of the index of orthodontic treatment need (IOTN-DHC) and other BDD risk factors in orthodontic patients: A preliminary study** 
Farhad Sobouti, Foruzan Elyasi, Reza Alizadeh Navaei, Farbod Rayatnia, Nika Rezaei Kalantari, Sepideh Dadgar, Vahid Rakhshan
- 16 **Evaluation of the cell viability and antimicrobial effects of orthodontic bands coated with silver or zinc oxide nanoparticles: An *in vitro* study** 
Rashin Bahrami, Maryam Pourhajibagher, Alireza Badieli, Reza Masaeli, Behrad Tanbakuchi
- 26 **Consideration of root position in virtual tooth setup for extraction treatment: A comparative study of simulated and actual treatment results** 
Mirinae Park, Veerasathpurush Allareddy, Phimon Atsawasuwan, Min Kyeong Lee, Kyungmin Clara Lee
- 35 **Does surgically assisted maxillary protraction with skeletal anchorage and Class III elastics affect the pharyngeal airway? A retrospective, long-term study** 
Elvan Onem Ozbilen, Petros Papaefthymiou, Hanife Nuray Yilmaz, Nazan Küçükkeleş
- 45 **Comparative evaluation of shear bond strength of orthodontic brackets bonded to three-dimensionally-printed and milled materials after surface treatment and artificial aging** 
Ameer Biadsee, Ofir Rosner, Carol Khalil, Vanina Atanasova, Joel Blushtein, Shifra Levartovsky

Case Report

- 54 **Correction of late adolescent skeletal Class III using the Alt-RAMEC protocol and skeletal anchorage** 
Muhammed Hilmi Büyükçavuş, Ömer Faruk Sari, Yavuz Findik

AIMS AND SCOPE

The Korean Journal of Orthodontics (KJO) is an international, open access, peer reviewed journal published in January, March, May, July, September, and November each year. It was first launched in 1970 and, as the official scientific publication of Korean Association of Orthodontists, KJO aims to publish high quality clinical and scientific original research papers in all areas related to orthodontics and dentofacial orthopedics. Specifically, its interest focuses on evidence-based investigations of contemporary diagnostic procedures and treatment techniques, expanding to significant clinical reports of diverse treatment approaches.

The scope of KJO covers all areas of orthodontics and dentofacial orthopedics including successful diagnostic procedures and treatment planning, growth and development of the face and its clinical implications, appliance designs, biomechanics, TMJ disorders and adult treatment. Specifically, its latest interest focuses on skeletal anchorage devices, orthodontic appliance and biomaterials, 3 dimensional imaging techniques utilized for dentofacial diagnosis and treatment planning, and orthognathic surgery to correct skeletal disharmony in association of orthodontic treatment.

KJO accepts original research articles, case reports, review articles and readers forums. The manuscripts submitted to KJO are processed through online edit system for expedient and efficient submission, review and edit procedures. As of January of 2012, KJO (abbreviated as 'Korean J Orthod') is indexed in SCIE, SCOPUS, PubMed Central (PMC), Google Scholar, DOI/Crossref, Korea Citation Index (KCI), KoreaMed, KoreaMed Synapse and KoMCI. The KJO is financially supported by the Korean Association of Orthodontists.

THE KOREAN JOURNAL OF ORTHODONTICS
