Review Article
345 Managing oral biofilms to avoid enamel demineralization during fixed orthodontic treatment
Jung-Suh Ahn, Bum-Soon Lim, Sug-Joon Ahn

Original Articles
358 Three-dimensional evaluation of the pharyngeal airway space in patients with anterior open bite
Seong-Sik Kim, Yong-Ill Kim, Soo-Bryung Park, Sung-Hun Kim
365 Risk factors for orthodontic fixed retention failure: A retrospective controlled study
Kaat Verschueren, Arvind Rajbhoj, Giacomo Begnoni, Guy Willems, Anna Verdenck, Maria Cadenas de Llano-Perula
374 Periodontal health status, oral microbiome, white-spot lesions and oral health related to quality of life-clear aligners versus fixed appliances: A systematic review, meta-analysis and meta-regression
Ana Sandra Llano-Romero, Milagros Adobes-Martín, José Enríquez Iniesta-Cortés, José María Montiel-Company, Daniela Gacovitch
393 Effects of 4-hexylresorcinol on facial skeletal development in growing rats: Considerations for diabetes
Hannah Jeong, Ina Young Kim, Xiangguo Che, Je Yong Choi, Insan Jang, Seong-Gon Kim
402 Differences in facial soft tissue deviations in Class III patients with different types of mandibular asymmetry: A cone-beam computed tomography study
Ho-Jin Kim, Hyung-Kyu Noh, Hyo-Sang Park
420 Biomechanical analysis for different mandibular total distalization methods with clear aligners: A finite element study
Sewon Oh, Youn-Kyung Choi, Sung-Hun Kim, Ching-Chang Ko, Ki-Bum Kim, Yong-Ill Kim
AIMS AND SCOPE

The Korean Journal of Orthodontics (KJO) is an international, open access, peer reviewed journal published in January, March, May, July, September, and November each year. It was first launched in 1970 and, as the official scientific publication of Korean Association of Orthodontists, KJO aims to publish high quality clinical and scientific original research papers in all areas related to orthodontics and dentofacial orthopedics. Specifically, its interest focuses on evidence-based investigations of contemporary diagnostic procedures and treatment techniques, expanding to significant clinical reports of diverse treatment approaches.

The scope of KJO covers all areas of orthodontics and dentofacial orthopedics including successful diagnostic procedures and treatment planning, growth and development of the face and its clinical implications, appliance designs, biomechanics, TMJ disorders and adult treatment. Specifically, its latest interest focuses on skeletal anchorage devices, orthodontic appliance and biomaterials, 3 dimensional imaging techniques utilized for dentofacial diagnosis and treatment planning, and orthognathic surgery to correct skeletal disharmony in association of orthodontic treatment.

KJO accepts original research articles, case reports, review articles and readers forums. The manuscripts submitted to KJO are processed through online edit system for expedient and efficient submission, review and edit procedures. As of January of 2012, KJO (abbreviated as ‘Korean J Orthod’) is indexed in SCIE, SCOPUS, PubMed Central (PMC), Google Scholar, DOI/Crossref, Korea Citation Index (KCI), KoreaMed, KoreaMed Synapse and KoMCI. The KJO is financially supported by the Korean Association of Orthodontists.
EDITORIAL BOARD

Editor-in-Chief
Theodore Eliades
University of Zurich, Switzerland

Editor Emeritus
Hyoung-Seon Baik
Yonsei University, Korea

Deputy Editor
Sung-Hoon Lim
